The new white system introduces a light expression to the collection and can be used as entirely white or mixed with both oak and black elements. The surface of the white system is different from its black and oak counterparts. It has a PU painted finish, creating a solid lacquered surface, smooth to the touch.

Shelving System is built entirely from individual parts. Enabling you to create an entirely customised system that perfectly matches your needs. Pivot. Expand. Go wider. Go higher. Shelving system allows you to create a huge array of combinations. Each system, whether black, oak or white, relate and interact with their spatial surroundings in an entirely different way.

**ABOUT MOEBE**

MOEBE is a Scandinavian design studio that creates products, furniture, and interiors. Formed in 2015 by architects Martin de Neergaard Christensen, Nicholas Oldroyd and cabinet maker Anders Thams.

MOEBE designs everything in-house and develops their own products into production. The products are designed with modularity in mind, they are component-based and can be repaired, assembled, and recycled with ease. MOEBE strives to reduce their designs to their most simple form. Developing new details and techniques for bringing different materials and elements together.
