Give new life to your walls with Moebe's new Frame colour collection

Frame by Moebe

The Frame by Moebe collection is expanding. Four new colours carefully selected. Each with its own personality, mood, and expression. Pale Rose, Light Grey, Petrol Blue, and Deep Red are the four new colours that Moebe is introducing the iconic transparent frame in.

The Pale Rose and Light Grey are soft and natural tones. Whereas, the Petrol Blue and Deep Red are more grounded and have a distinct character. Either way, all four colours add a playful and vibrant touch to any room or frame wall.

"Our color-universe has always been very subtle and based on natural materials. With our new colours we want to expand this part of the Moebe universe. Colours are a very emotional and personal thing to us - so there is really no reason not to add this dimension to our designs also".

About Frame by Moebe

Frame by Moebe is a reinterpretation of the original picture-frame. It consists of two pieces of acrylic glass, four lists made of either untreated oak or aluminum and a rubber band. The rubber band both holds the frame together and serves for hanging the frame on your wall. By keeping the construction to the outer edge the glass is held free and fully transparent. This allows the motif to hover against the underlying background, giving new possibilities to how and what can be framed.

About Moebe

Moebe is a Scandinavian design brand based in Copenhagen. The design company was founded in 2014, with a goal to create simple and beautiful designs with thoroughly thought out constructions that surprise in their banality. Moebe's designs are therefore often constructed based on solutions that in an architectonic way bring together more than one element and material without gluing, welding or any other hidden solutions. This way of constructing requires great precision and focus on details. A Moebe-design can therefore always be recognized on its minimalistic and clean aesthetic expression and on the surprisingly simple construction.

Moebe was founded by cabinetmaker Anders Thams and architects Nicholas Oldroyd and Martin D. Christensen, who are behind all of the brand's designs. This ensures a coherent mode of expression from idea over production to packaging and the finished design.
