## A piece of wood

**Cutting Board is MOEBE's take on the classic cutting board, designed with the aim to make it as simple as possible.**

MOEBE now launches Cutting Board, a beautiful piece of wood in solid oak. Multi-purpose products are becoming more and more relevant in the small households and the Cutting Board is designed to be used in the everyday kitchen while the minimalist design also invites it to be used directly on the dining table as a serving tray.

The Cutting Board is available in two sizes, small and large. The small one is perfect for a loaf of bread while the bigger can function as a serving tray ideal for tapas, cheeses and other small dishes.

The cutting board is elegant with a simple expression - as simple as a piece of wood. The two end edges have an elegant twisted v-shape, making it easy to grab it directly from the table.

## About MOEBE

MOEBE is a Scandinavian design studio that creates products, furniture, and interiors. Formed in 2014 by architects Martin de Neergaard Christensen, Nicholas Oldroyd and cabinet maker Anders Thams.

MOEBE designs everything in-house and develops their own products into production. The products are designed with modularity in mind, they are component-based and can be repaired, assembled, and recycled with ease. MOEBE strives to reduce their designs to their most simple form. Developing new details and techniques for bringing different materials and elements together.

*"We love when people look at our design and say 'why didn't anyone think of this before' because that tells us that the design has been boiled down to the very essentials and could not have been made more simple without losing its functionality",* says Martin de Neergaard, partner MOEBE.

The Cutting Board is made of sustainably grown and certified solid European oak and is available in two sizes. The oak is left untreated to keep it as natural as possible.

The Cutting Board is in stores from September 2020.
